GIFT GUIDES NEW

“Gifts That Nourish” is a new guide we added this year for all our foodies and home chefs. You’ll find that all the goodies on this list excite the senses or enhance the experience in and outside the kitchen.

In other words, these are the gifts to give those who love all things food and fun!

1

GIFTS THAT NOURISH
NUTRAMILK

NutraMilk

If you've got someone on your gift list that enjoys nut milks and butters, they'll LOVE Nutramilk! Until now, making your own alternative milks and butters involved long arduous processes. Thanks to Nutramilk nut processors, alternative milks & butters can be produced in just a few minutes! The processors are large capacity and allow you to process up to 2 liters of alternative milk or 3 cups of nut butter with every use. They even have a built-in dispensing spigot for ease of use!

The best part about making your own nut milks and butters is that you know exactly what goes into them. With the help of a Nutramilk processor, there's no reason to buy store bought alternative milk products again. There's no need to worry about not knowing what ingredients to use, either. The processors come with a 200-recipe cookbook for inspiration and instruction. Various accessories are available as well for more processing and storage options.
